| From: | Robert Lindsey – Project Engineer, NP01 | | |
| Subject: | Steering Column Extension | Date: | 15 Feb 2016 |

Attention all Élan NP01 customers:

Many customers have enquired about methods to bring the steering wheel closer to the driver. Normally this would be achieved by spacers between the steering wheel and the quick release hub.

We are offering an alternative to this method for situations where the desired spacing is greater than 1". The steering column extension, Elan Part # NP01-15-027, can be seen below shown in blue.

This Part **WILL BE LEGAL** for NP01 Spec Series competition. As with other optional parts, exact pricing will be determined based on the level of interest from customers.
