

Technical Bulletin

NP01	TB0010-2016	Élan Motorsports Technologies	
From:	Robert Lindsey – Project Engineer, NP01		
Subject:	AEM Data Collection Stick	Date:	8 March 2016

Attention all Élan NP01 customers:

Please remember to install the AEM USB stick in order to collect ECU data. It is important that this be installed at ALL TIMES to aid in problem solving. This data is also mandatory for the series to ensure compliance of all participants.

Each AEM Infinity box contains a cable and USB stick. This cable should be routed so that the stick is accessible from the left side door. This cable may be zip tied to the door bar or the edge of the driver's seat. The USB stick contained in the Infinity box is a 4gb but the system can accommodate up to 64gb sticks.
