DP02	TB0017-2007	Elan Motorsports Technologies	
From:	Chip Lewis		
Subject:	<i>Upgraded Internal Fuel Line, Pump to Cell Top</i>	Date:	June 6th, 2007

Attention all Elan DP02 teams

For teams wanting to upgrade their internal fuel line (The line between the fuel pump and the top of the fuel cell) EMT has a high performance line available, part number DP02-50-006. The line is a braided Nomex line with a Teflon liner. The line fits to the fuel pump by sliding over the pump barb. The line is then secured with a hose clamp (Not included). The other end of the line secures to the top of the fuel cell with a -6 AN fitting (Crimped to the line to prevent working loose). The line is manufactured slightly long to allow for teams' fitment preference, and may require slight trimming.
