<b>From:</b>	Christian Rushforth		
<b>Subject:</b>	<i>Rear Pushrod Upgrade</i>	<b>Date:</b>	July 5th, 2007

---

## Attention all Elan DP02 teams

EMT has been made aware of two recent rear pushrod failures on cars during transportation.

While no failures have been seen during on circuit racing conditions, EMT can now offer teams an option to upgrade to an improved strength rear pushrod with a 25% increase in buckling strength.

EMT have no reason to believe that the load seen during transportation is higher than that seen on the circuit so it is not fully understood at this time why the failures have occurred.

Revised components **PUSHROD 4130 - WIDE TRACK**, Part No **DP02-20- 018** will be made available to teams no later than the Mosport Grand Prix weekend 25<sup>th</sup>/26th August. It is advised that teams wishing to upgrade to this new specification should place orders with EMT IMSA Lites 1 distributor Comprint Motorsports Inc. Tel. (706) 543-1797
