

Technical Bulletin

DP02	TB0023-2008	Elan Motorsports Technologies	
From:	Chip Lewis		
Subject:	<i>Brake Pad Thermal Shim</i>	Date:	March 3 rd , 2008

Attention all Elan DP02 teams

Available to order is an optional Brake Pad Thermal Barrier Shim (Stainless Steel), DP02-10-006. The shim acts as a thermal barrier to help lower brake fluid temperatures. A DP02 requires 8 total shims (2 per brake calliper). Each shim has two tabs on it that a team can use to help retain the shim, or cut off. Teams may modify the shim slightly for fit, but the overall shape must remain as delivered.

Parts prices and delivery information available upon request from Comprent Motorsports.
