## **Attention all Elan DP08 teams running scca sanctioned events.**

EMT has developed SCCA specific (90CM rule) rear wing end plates to be used with our updated aero package for the DP08. These parts are specific for SCCA sanctioned events and may not be legal in all series.

The trailing edge has a small formed section for added rigidity and therefore the parts are handed.

Multiple mainplane mounting locations allow for the upper flap assembly to be located from 90CM down to 60CM in 10CM increments.

Part Numbers:

- **DP08-47-021 – SCCA RWEF, LHS**
- **DP08-47-022 – SCCA RWEF, RHS**

These parts will be available November 1<sup>st</sup>, 2011 and should be ordered through Carl Haas Automotive.
